Summary

Master of IT student at UNSW (WAM 83, graduating Dec 2026). Focusing on agentic AI and backend systems. IEEE-published research, hands-on experience shipping multi-agent pipelines, graph databases, and event-driven architectures across internship and research contexts.

Education

Master of Information Technology - UNSW Sydney, Australia

Feb 2025 - Dec 2026 (expected), WAM 83 (Distinction average)

Relevant coursework in Computer Science, Software Engineering, and AI.

Exchange Study - Master of Science in Information Technology - IMT Atlantique, Rennes, France

Sep 2022 - Jan 2023, Specialisation in Architecture and Engineering in IoT.

Bachelor of Automotive Design and Manufacturing Engineering - Chulalongkorn University, Bangkok, Thailand

Aug 2019 - Aug 2023, Mechanical Engineering, Electrical Engineering, and Project Management.

Work Experience

Software Engineer Intern, Tendor, Australia, Jul 2026 - Sep 2026

- Built a Google ADK pipeline that extracts and classifies procurement documents in production, feeding insights into downstream agent workflows and the memory system.
- Designed and deployed an MCP-exposed Documenso signing service, giving agents autonomous document-signing capability.
- Automated end-to-end tender submission through MCP tools, replacing a manual multi-step process for agents.

Backend Engineer Intern, NodesNow LLC, Thailand, Dec 2025 - Feb 2026

- Engineered a fault-tolerant AI agent orchestration system using Inngest to manage document ingestion workflows, handling automated retries and fan-in/fan-out concurrency, eliminating manual failure intervention.
- Persisted ingested data into pgvector and Neo4j to support downstream RAG features.
- Containerized the full stack (backend services, Inngest server, and databases), enabling reproducible local development and smooth infrastructure migration.
- Implemented end-to-end with NestJS (backend) and React (frontend).
- github.com/Ravicha2/document-ingestion-agent

District Heating Designer, 3D Technical Design, Thailand, Aug 2023 - Jan 2025

- Designed 2D and 3D route arrangements with stress calculations for heat distribution across 10+ UK sites.
- Identified operational hazards for contractors in construction and handover phases.
- Mentored an intern and colleagues on construction design workflows.

Projects

GraphRAG-Enhanced Memory Management for Intelligent Agents - Research, UNSW, June 2026

- Built an end-to-end ADR violation detector for AI-generated code, ingesting source files and ADR documents into an Architectural Decision Graph and traversing it to surface constraint conflicts.
- Implemented tiered conflict resolution, and integrated violation reporting into GitHub commit status checks.
- Benchmarked against baseline across 5 open source repositories: 62% lower token cost, 27% faster review time, and nearly 2x precision.
- Stack: Python, FastAPI, Neo4j, Docker, uv
- github.com/Ravicha2/Shepherd

Lit-Review-Council - Kaggle × Google: 5-Day AI Agents Intensive Course, June 2026

- Designed a tiered multi-agent orchestration pipeline using Google ADK with parallel/sequential wave execution, dual-track research agents (academic via ArXiv/OpenAlex, practitioner via GitHub), and a 3-reviewer Borda-count ensemble.
- Shipped as a MCP server on PyPI, installable via `uvx lit-review-council`; compatible with Claude Code, VS Code, and Cursor.
- Implemented guardrails: citation validation, dangling-reference rejection, source-tier classification, and automated retry logic.
- github.com/Ravicha2/lit-review-council

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, C++, C, Bash, HTML/CSS

Frameworks & Libraries: FastAPI, NestJS, React, LangGraph, Inngest, TensorFlow, Keras

Data & Databases: PostgreSQL, Neo4j, Apache AGE, pgvector, Apache Spark, Hadoop

Cloud & DevOps: Docker, AWS (S3, EC2), Vercel, Supabase, Git

Publication

Position Accuracy of a 6-DOF Passive Robotic Arm for Ultrasonography Training

IEEE Region 10 Technical Conference (TENCON 2023) - Co-author and presenter

- Presented ultrasound probe tracking system (position and orientation) to foster sonography training, implemented in C and MATLAB.
- Advisor: Assoc. Prof. Ronnapree Chaichaowarat, PhD.

Extracurricular

Leadership Foundation Program - UNSW Sydney, May 2025

3-day workshop covering leadership, DEI in workplaces, and communication.

Professional Development Program - UNSW Sydney, Sep 2025

3-day intensive training in communication, personal branding, and networking.
